

PRODUCT MARKETING CANVAS

Project: "GULLAK" App | Strategy Directive for CMO

1. EXECUTIVE SUMMARY & CORE POSITIONING

This document outlines the Go-To-Market (GTM) and product onboarding strategy for **Gullak**. The objective is to penetrate the "Bharat" demographic by leveraging absolute cultural familiarity. We are transforming the traditional, zero-yield earthen pot into an engine for active wealth generation through a frictionless digital experience.

Jobs-to-be-Done (JTBD) Framework

The Core Job: "Help me secure my future through small, manageable daily actions, using a system I intuitively trust, without the friction of complex wealth management."

The USP: We are introducing **Savestment**—a proprietary category that solves the fundamental flaw of the physical Gullak (idle cash depreciation) while keeping its psychological safety intact.

Primary Tagline: "नए ज़माने की पुरानी आदत" (The old habit of a new era).

2. THE "DIGITAL EARTHEN POT" ONBOARDING FLOW

To maximize Product-Led Growth (PLG), the onboarding sequence relies heavily on the physical metaphor of the Gullak, creating a zero-cognitive-load transition from tradition to fintech.

Phase	Visual / UI Action	Psychological Purpose & Copy
1. The Cultural Anchor (0-3 seconds)	A 3D, beautifully textured earthen Gullak appears. It gives a subtle, magical metallic "shine" to signify it holds real value. The name "Gullak" fades in below.	Copy: "नए ज़माने की पुरानी आदत" Instant, zero-cost brand recall. Triggers deep-seated nostalgia and inherent trust.
2. The Problem Statement (4-10 seconds)	The physical Gullak shakes as a coin drops in, but it remains static.	Copy: "Mitti ke Gullak mein paisa sirf aaram karta hai..." (Money only rests in a clay Gullak...) Gently challenges the traditional method by highlighting idle cash.
3. The "Savestment" Reveal (11-20 seconds)	The earthen Gullak smoothly morphs into a glowing, modern digital icon. A green growth chart sprouts from it. Words "Save" and "Invest" merge.	Copy: "...Digital Gullak mein paisa kaam karta hai. Sirf Save nahi, Savestment karein." Delivers the core value proposition and introduces the new behavior.

3. CONVERSION DRIVERS & PLG MECHANICS

We replace the intimidating sign-up wall with an interactive discovery tool that quantifies the consulting-grade compounding effect in layman's terms.

- **The Daily Spend Slider:** Users drag a slider starting from ₹10. The UI links this to daily micro-transactions (e.g., ₹15 = 1 Chai, ₹30 = Samosa).
- **Impact Quantification:** As the slider moves, it calculates compounding returns.
"Your daily chai money could become ₹45,000 in 5 years!"
- **High-Intent CTA:** The primary button shifts from passive to active ownership:
"Apna Digital Gullak Banayein" (Create your Digital Gullak).

Target Impact Metrics: **Lower CAC via cultural virality**

Optimize D1 to D7 retention loop

4. TRUST ARCHITECTURE & RISK MITIGATION

To convert cultural trust into financial trust, we embed institutional credibility directly into the user interface without overwhelming the user.

- **The Safety Shield:** Prominent badge: *"100% Safe | RBI Regulated Partners"*.
- **Absolute Liquidity:** *"Todna aasan, nikalna aasan"* (Easy to break, easy to withdraw) - mirroring the physical act of breaking a Gullak to access funds instantly.
- **Abstracted Complexity:** The backend mechanics (routing low-yield deposits to higher-yield instruments) remain entirely invisible to the user.
